Summary

Computer Science student with strong programming skills in C++ and Python, and hands-on experience in web development. Skilled in problem-solving, data handling, and project implementation. Strong background in customer service and teamwork with a passion for technology and software development.

Technical Skills

- C++, Python, MySQL
- HTML, CSS, JavaScript (basic)
- Object-Oriented Programming (OOP)
- Problem-solving & analytical skills

Projects

• Real-Time Emotion Detection

Developed a real-time facial emotion recognition system using OpenCV for face detection and a pretrained Keras model for classification. Integrated live webcam feed for instant predictions.

Tech stack: Python, OpenCV, TensorFlow/Keras, NumPy

• QR Code & Barcode Scanner

Built a Python-based scanner using Pyzbar to detect QR codes and barcodes through the camera and open embedded links automatically.

Tech stack: Python, Pyzbar, OpenCV

• Shahsawaar Website

Created a personal branding website using front-end technologies to showcase projects and portfolio.

Tech stack: HTML, CSS, JavaScript

Experience

• Intern – Artificial Intelligence Community of Pakistan (Jan 2024 – Feb 2024)

Completed 8-week online coding internship focused on AI and software projects.

• Customer Service Representative – Kelly Services Ltd (Hybrid) (Jun 2023 – Nov 2023)

Updated client records and processed documents using MS Office. Managed purchase orders and customer data.

• Client Services & Support – Webring, Lahore (Jan 2023 – May 2023)

Assisted customers, promoted services, and ensured satisfaction. Coordinated deliveries and maintained records in MS Excel/Word.

• Intern – World Wide Fund (Hybrid)

Promoted eco-friendly programs and recycling campaigns. Collaborated with students worldwide on sustainability projects.

Education

• University of Lahore, Lahore

B.Sc. Computer Science (2022 – 2026)
